

Term Paper Guidelines

For this project you need to review and research at least 5 technical papers related to one of the following topics:

- Software Product Line Architectures, Libraries, Frameworks, and Technologies for Web-based Applications
- Software Product Line Architectures, Libraries, Frameworks, and Technologies for Mobile-based Applications
- Software Product Line Architectures, Libraries, Frameworks, and Technologies for Cloud-based Applications
- Software Product Line Architectures, Libraries, Frameworks, and Technologies for Social Media Applications
- Software Product Line Architectures, Libraries, Frameworks, and Technologies for Digital Marketing Applications for IoT

Your project for the term paper is a research paper that is meant to present a comparative analysis for the papers that you read in the technical area you have selected.

Please note that no more than two teams can work on the same project topic; topics will be allocated based on FCFS.

Your research paper review shall be composed of roughly 2500-5000 words. You shall use MS-Word for your writing and final submission. In your review, define the problem clearly in the introductory remarks, And then have a comparative analysis between the different approaches that you review.

You can use any “**refereed and peer-reviewed**” references available on the Internet, or the library.

Make your main source of technical references to be:

- www.acm.org
 - Conferences
 - Journals
 - Magazine

- www.computer.org
 - Conferences
 - Journals
 - Magazine

Your review paper shall have the following structure:

Title

Introduction

----- (300-1000 words)

Discussion of relevant topics

----- (2000-3700 words)

Conclusion

----- (200-300 words)

References

4 references
