

Answers:

- Answer for Question#4:
10/7/2016 (HW1_Vinay_Pavithra_Project1.mpp)
- Answer for Question#5:
5/2/2017(HW1_Vinay_Pavithra_25%Allocation.mpp)

Assumptions made:

- Assumptions for task dependencies:
 1. Project Manager is the author of 'Project Plan' and 'Risk Mitigation and Contingency Plan'.
 2. Project Plan is the first phase in the project.
 3. Requirements Phase can start as soon as project plan phase is finished.
 4. "Write Use Case Model" task can start only after "Write Requirement" task is finished.
 5. Documentation phase should be finished before "Execute TP (Test cases)" starts.
- Assumptions for resource allocation.
 1. Duration is not reduced for review "meeting" tasks. As all involved parties are involved in same meeting.
 2. Review/inspection "preparation" tasks are split up across each resources. All engineers are not required to prepare for the entire task.
